File Permission Security Scanner
========================================
Setting up test environment...
Test files created in: ./test_files

========================================
Scanning for INSECURE Files/Directories
========================================

--- World-Writable Files & Directories ---
[FILE] ./test_files/config/database.conf (666)
[FILE] ./test_files/scripts/backup.sh (777)
[FILE] ./test_files/web/index.html (777)
[FILE] ./test_files/data/users.txt (666)
[DIR]  ./test_files/uploads (777)

Found 5 world-writable items

--- Executable Non-Script Files ---
[EXEC] ./test_files/config/settings.conf (755)
[EXEC] ./test_files/web/index.html (777)
[EXEC] ./test_files/web/style.css (755)

Found 3 files that shouldn't be executable

========================================
Security Scan Complete
========================================
Summary:
- World-writable items found: 5
- Improperly executable files found: 3
- Total security issues: 8

⚠️ SECURITY ALERT: 8 permission vulnerabilities detected!
These files need immediate attention.
